No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Sequence 34, 2 Sequence 34, 2 Sequence 34, 2 Sequence 67, 2 Sequence 67, 2 Sequence 67, 2

Patent No. 6084069
GENERAL INFORMATION:
GENERAL INFORMATION:
APPLICANT: UNITED STATES OF AMERICA; DEPT.
APPLICANT: OF HEALTH AND HUMAN SERVICES
TITLE OF INVENTION: MOTILITY STIMULATING
TITLE OF INVENTION: PROTEIN USEFUL IN CANCER DIAGNOSIS AND
TITLE OF INVENTION: THERAPY
NUMBER OF SEQUENCES: 69
CORRESPONDENCE ADDRESS:
                                                                                                297 DHERLRSMPSILSNL----ISLDTNMPFGPE--

| Sequence 36, Application US/08977221
| Patent No. 6084069
| GENERAL INFORMATION:
| APPLICANT: UNITED STATES OF AMERICA; DEPT.
| APPLICANT: OF HEALTH AND HUMAN SERVICES
| TITLE OF INVENTION: MOTILITY STIMULATING
| TITLE OF INVENTION: PROTEIN USEFUL IN CANCER DIAGNOSIS AND
| TITLE OF INVENTION: THERAPY
| NUMBER OF SEQUENCES: 69
| CORRESPONDENCE ADDRESS:
| ADDRESSEE: MORGAN & FINNEGAN
| STREET: 345 PARK AVENUE
| CITY: NEW YORK
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   907 YLHTYESEI 915
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   US-08-977-221-36
                                                                                                                                      179

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

MOI. Cell. Biol. 9:3323-3331(1989).
-!- FUNCTION: THIS ENZYME HAS BOTH RNASE AND DNASE ACTIVITY.
-!- COFACTOR: REQUIRES MANGANESE OR MAGNESIUM.
-!- SUBGUIT: HOMODIMER.
-!- SUBCELLULAR LOCATION: MITOCHONDRIAL INNER MEMBRANE.
-!- SIMILARITY: BELONGS TO THE DNA/RNA NON-SPECIFIC ENDONUCLEASES
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           799 HDTEDKIKQYVEGS--SIPVPTHYYSIITSCLDFTQPADKCDGPLSVSSFILPHRP-DNE
